## WEDNESDAY & THURSDAY, OCTOBER 12 & 13

---

## VAVA'U

---

Over the next two days, partake in an experience of a lifetime by swimming up close and personal with Humpback Whales. Before departing the resort, each guest will be fitted with their snorkeling gear and provided with a personalized bag to put their equipment in for the next four days.

Holidaymakers are not the only ones to return to Tonga's shores on a regular basis. After a long journey north from the icy krill-laden depths of Antarctica, southern humpback whales take shelter in the tropical reef-protected waters of Tonga to give birth to their young.

The arrival of the whales from July to November completes a remarkable cycle, as the new calves return to where they were first conceived 11 months earlier. Tonga is one of the few places in the world where you can swim with whales. You may get to hear the beautiful singing, see the stunning full body breaching, watch as a group of males peruse a female mate or see a mother gently tending to her calf.

Each day can be quite different, as our opportunities are solely dictated by the whales' activity and presence. Swimming excursions will be monitored by our guides with the well-being and safety of both the whales and participants as a top priority. Each swim can last anywhere from 10 to 30 minutes at a time, depending on conditions and the comfort level of the whales. If the animals seem stressed or disturbed by our presence, the guides reserve the right to conclude the experience at any time. This process will be repeated throughout the day.

Enjoy dinner in house.
